### Allegro Packets Expands Foreign Business Bringing Russian Reseller TF.ZONE on Board

Leipzig, Germany / Moscow, Russia – 26. May 2020: The smart troubleshooting appliances of German-based network specialist Allegro Packets ([allegro-packets.com/en](http://allegro-packets.com/en)) will now be distributed in Russia. With TF.ZONE, Allegro Packets is expanding its international Partner network with an experienced IT supplier of network monitoring and information security.

Allegro Packets GmbH, a leading provider and specialist in the field of monitoring and network analysis, provides network administrators around the world with sophisticated network diagnostic equipment for measuring, analyzing and debugging network traffic. The Allegro Network Multimeters range from the ultra-portable Allegro 200 Series to the 100 Gbps 4U solution for core networks, data centres and ISPs.

TF.ZONE specializes in the development and sale of network test and measurement solutions, and supports its customers throughout the entire process: from consulting, equipment and software delivery to commissioning and maintenance. Customers, which include well-known organizations and institutions appreciate TF.ZONE's constant commitment to offering leading-edge products and solutions tailored to their needs.

"We are very pleased to have engaged with TF.ZONE as an experienced partner which is highly valued by its customers," said Klaus Degner, Managing Director at Allegro Packets, commenting on the sealed partnership. "With them at our side, we can pursue our continuing international market development."

Alexey Zaetzky, Director at TF.ZONE, commented: "Thanks to the ability of Allegro Network Multimeters to significantly speed up and simplify network monitoring and analysis, our cooperation with Allegro Packets is a great benefit to our customers. We look forward to working together."

## About Allegro Packets

The network analysis specialist [Allegro Packets](#) offers innovative troubleshooting and analysis products to solve network issues with the Allegro Network Multimeter range of appliances. The innovative features of Allegro products meet all requirements for information infrastructures. Customers include enterprises, data centers, IT service providers, system houses and ISPs.
