Allegro Packets Announces an Exciting New Partnership with the Swiss System House emitec ag.

Leipzig/Bern, October 16, 2018 - Allegro Packets, the market leading manufacturer of network testing and monitoring appliances announces a new partnership with emitec ag, a Swiss system house renowned for solutions which measure, log, analyze, optimize, test and manage networks & applications.

The agreement includes the distribution of Allegro Packets state-of-the-art network diagnostic tools, the award-winning Allegro Network Multimeters which further consolidate Allegro Packets' leadership in the international marketplace. Allegro Packets products include the Allegro 200, Allegro 1000, Allegro 3000 series and Allegro 5000 series. Professionals all over the world save their organizations significant troubleshooting time and money by using Allegro Network Multimeters. Network problems and packet losses can be detected with just a few clicks, as can performance bottlenecks. The Allegro Network Multimeter uses powerful software algorithms to analyze load peaks and high granularity disturbances while acting as a powerful network monitoring tool to ensure high network quality.

Network problems are often reported long after issues occur. The Allegro Network Multimeter displays what traffic was present at any specific location in the network at an exact time. Expired connections can be examined and analyzed from the event history log. The appliance offers a clear before and after comparison that includes network users and protocols as well as detailed statistics of the individual server services (SMB, http, SSL, etc.).

Klaus Degner, managing director and founder of Allegro Packets, commented on the agreement: "I am very excited about the partnership with emitec ag. There has been an excellent relationship between the management of emitec ag and myself for many years. With this distribution agreement, both companies will increase their customer support and further expand their presence in the field of testing and troubleshooting."

"emitec is very pleased to extend our cooperation with Allegro Packets through this reseller agreement," said Josip Simic, Product Manager & Systems Engineer at emitec ag. "Allegro Packets is a very versatile and innovative vendor with a great future and we are proud to be able to use our proven expertise and experience in the Swiss market to focus on these virtues. The partnership with Allegro Packets will be a key element in our distribution strategy for the coming year."
