

## PRESS INFORMATION

### Allegro Packets' worldwide reseller network expands to Finland

Leipzig / Pori, 7. November 2018 - Allegro Packets GmbH ([allegro-packets.com](http://allegro-packets.com)), a market leader in network testing and analysis, and Timeless Technology ([timeless.fi](http://timeless.fi)), one of Finland's largest IT distributors, today announced an agreement to distribute Allegro Network Multimeter.

With this new partnership, Allegro Packets significantly expands its international partner network, and Timeless Technology complements its portfolio with the world's leading network analysis and troubleshooting family of products. The Timeless Technology portfolio includes reseller training, development opportunities, additional services and excellent customer support.

State-of-the-art network diagnostic tools developed by Allegro Packets include the Allegro 200 Series, Allegro 1000 Series, Allegro 3000 Series and Allegro 5000 Series. These products will be distributed by Timeless Technology throughout the country. The Allegro Packets Network Multimeter appliances are increasingly used by network administrators around the world to analyze network traffic in real-time and store past events to enable detailed, granular post-event investigation. This allows network problems, performance bottlenecks and packet losses to be quickly and easily identified. The Allegro Network Multimeter uses powerful software algorithms to analyze peak loads and high granularity disturbances while providing powerful network monitoring tools to ensure high network quality.

Katrin Pflugfelder, Managing Director and founder of Allegro Packets, commented on the agreement: "We are excited about our new partnership with Timeless Technology. When selecting partners for the reseller program, we focus on quality and professionalism. The partnership will open up another valuable international market and ensure that a highly respected and professional reseller will serve the Finnish market."

"Timeless Technology is pleased to distribute Allegro Packets products because the solution is easy to use for IT administrators and end users and can be implemented quickly. This saves managed service providers and

system integrators valuable time and money in network analysis," said Kari Ruhanen, Senior Partner of Timeless Technology. "Allegro Packets' market success is an ideal complement to our business and will enable our two companies to provide leading-edge solutions and support in the future."
