New Polish partner in Allegro Packets reseller network

Leipzig / Warsaw, 29. October 2018 - Allegro Packets GmbH (allegro-packets.com), a market leader in the field of network testing and analysis, and ALSTOR SDS (alstor.pl), one of the largest IT distributors in Poland have forged an alliance: The new distribution partner ALSTOR SDS from Warsaw will distribute the complete Allegro Packets portfolio in the Polish market with immediate effect.

The new partnership is based on Allegro Packets' philosophy of providing the market with high quality, leading-edge innovative network analysis and troubleshooting products and services (training, consulting and customer support).

The state-of-the-art network diagnostic tools developed by Allegro Packets include the Allegro 200, Allegro 1000, Allegro 3000 and Allegro 5000 Series. These appliances will be distributed by ALSTOR SDS throughout the country. Allegro Packets' tools are increasingly used by network administrators around the world to analyze network traffic in real time and to store past events to enable detailed, granular post-event investigation. This allows network problems, performance bottlenecks and packet losses to be quickly and easily identified. The Allegro Network Multimeter uses powerful software algorithms to analyze peak loads and high granularity disturbances, while providing powerful network monitoring tools to ensure high network quality and uptime.

Klaus Degner, managing director and founder of Allegro Packets, is convinced of the opportunities in their neighbour country: "We are very excited about the new partnership with ALSTOR SDS. We see great potential for network analysis and network monitoring products in Poland where we can meet all customer requirements with our wide range of appliances and solutions. With our versatile Allegro Network Multimeters, we are well placed to help small SMEs to large corporates and service providers."

"With the inclusion of Allegro Packets' innovative measurement and analysis products, we are closing a significant gap in our product portfolio", said Jarosław Kupiec, Business Development Director, ALSTOR SDS. "After

intensive research and discussions, we chose Allegro Packets, whose product portfolio and solutions offering ideally fit our requirements and the needs of our customers," Jarosław Kupiec stated.
